## Software Installation and Quick Guide

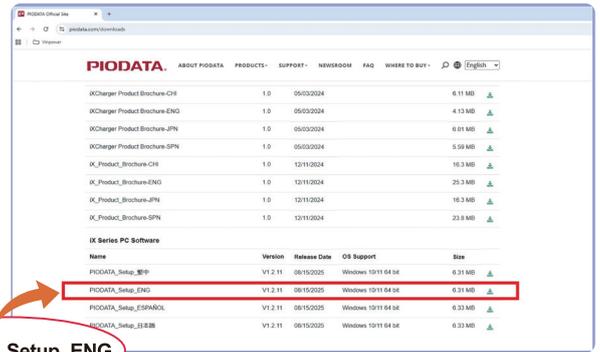

### Follow these steps to install the PIODATA Secure Log-in Software on your PC:

This allows those with PIODATA iX devices (iXflash, iXflash Cube, SecureX, and others) to turn on the Read Only or Trust Circle security feature or allow the user to access an iX device from a PC, when the Trust Circle was already activated\*.

\*The user must have been previously invited into the Trust Circle.

1) There are two places to access the PIODATA Secure Log-in Software:

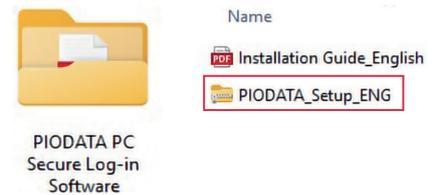

- a. Go to the [www.PIODATA.com/downloads](http://www.PIODATA.com/downloads).
  - i. Scroll down to “ iX Series PC Software ”
  - ii. Download the software in your preferred language

b. Plug your iX device into a PC.

- i. Open the file folder for that drive. The PIODATA software and installation guide will be preloaded onto your device.
- ii. Transfer the PIODATA software zip file on to your PC.

\*\*The Trust Circle must be turned off prior to connecting to a PC

2) Locate the PIODATA software zip file on your PC and extract the file onto your computer. Double-click on the installation file to load the software onto your PC.

3) Install the PIODATA software onto your PC, by following the prompts as directed.

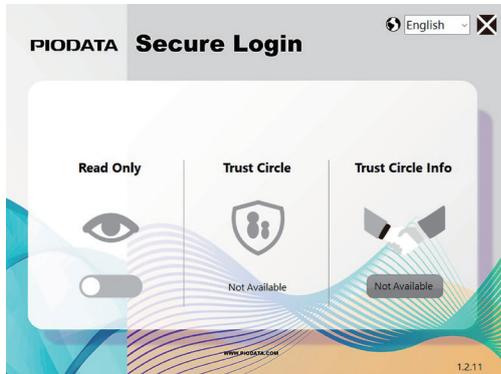

4) When the PIODATA software is installed on your computer, you should have a desktop icon similar to this image. Double-click this icon to open the app:

## After the PIODATA PC Secure Log-In Software is Installed

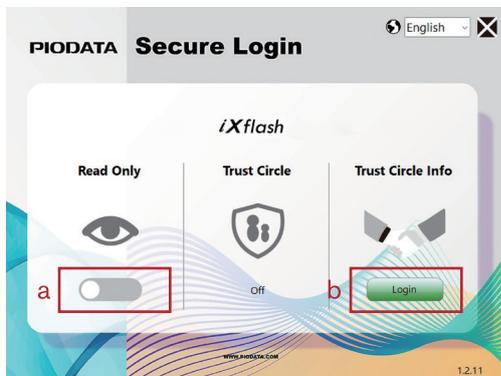

5) The image below shows the PIODATA Software screen when there's no iXflash device connected to the computer:

6) To activate the Trust Circle or Read Only feature through a PC, plug in an iX device into an available USB port on the computer.

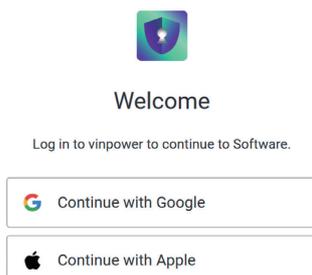

a. Turn the Read Only\* feature on or off

b. To use the Trust Circle feature, click on the "Create/Login" button to initiate the process and continue to Step 7).

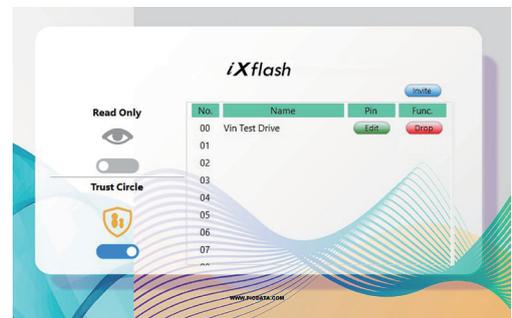

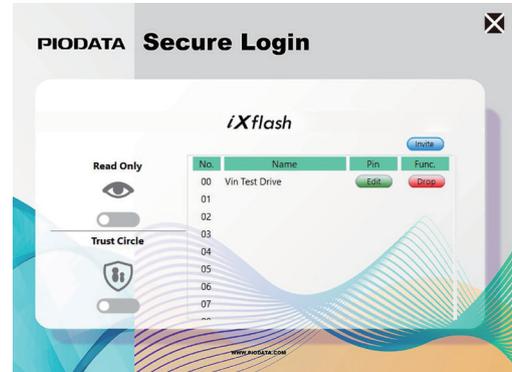

\* Please note that you can only activate the Read Only or Trust Circle function one at a time. They cannot both be operational at the same time.

7) When prompted, log in using your personal Apple or Google account.

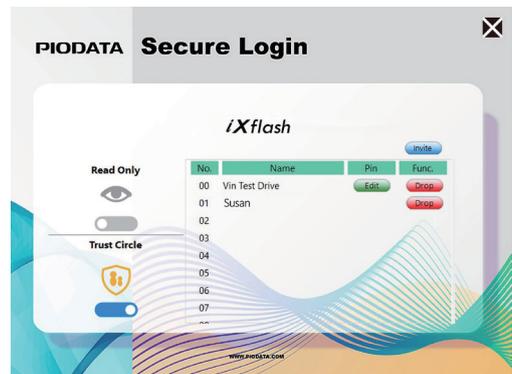

8) Once you've successfully logged in, you can:

a. Turn the Trust Circle\* feature on or off

b. You can review or modify the Trust Circle group.
